

Publications Catalog

2014

ChangeLab Solutions is a national nonprofit creating law and policy innovation for the common good. We work with government, community, and business leaders to build their capacity to use legal and policy tools to create environments where healthy options are available to everyone. The model policies, how-to guides, fact sheets, and other resources described in this catalog are all available at no cost from our website: click on the TOOLS tab throughout the website to search our full library of resources. You can also select a topic area from the four at the top of our website – [Healthy Planning](#), [Tobacco Control](#), [Childhood Obesity](#), [Healthy Housing](#) – and explore the TOOLS tab in that section for resources organized by more specific categories.

Workshops & Trainings

Every community is unique. ChangeLab Solutions will help craft a training tailored to your community's realities and health improvement goals. Trainings can be as short as an hour or run over several days. Many of the workshops we offer are outlined in our [Workshop & Training Catalog](#).

Feel free to contact ChangeLab Solutions to discuss customization options and price at info@changelabsolutions.org or 510.302.3380.

ChangeLab Solutions
Law & policy innovation for the common good.

Healthy & Sustainable Neighborhood Design

Growing evidence shows the neighborhoods in which we live play a strong role in determining access to healthy foods, transportation, physical activity, and more. ChangeLab Solutions offers many resources to show how governments, private developers, and community groups can all work to create patterns of development that improve community health.

Economic Development & Redevelopment

Economic development and redevelopment agencies manage a range of local, state, and federal economic development and public financing programs. How can you leverage local redevelopment initiatives as a way to improve public health? These resources for public health advocates and community residents can help improve access to healthy foods and physical activity.

Getting Involved in Redevelopment

Working with Public Health: A New Ally for Redevelopment

Healthier Communities through Redevelopment: Rebuilding Neighborhoods for Better Nutrition and Active Living

How to Use Economic Development Resources to Improve Access to Healthy Food

Economic Development and Redevelopment: A Toolkit for Building Healthy, Vibrant Communities

New Partnerships for Healthier Neighborhoods: Bringing Public Health and Redevelopment Together

How to Use Redevelopment to Create Healthier Communities (available in Spanish)

Transit-Oriented Development (TOD)

Investing in TOD can play a vital role in public health. Beyond its impact on environmental conditions like noise and air quality, TOD affects housing, employment, and a neighborhood's community assets. These resources explore the connections, highlighting transportation strategies that promote public health.

Getting Involved in Transportation Planning

Making a Place for Bicycles: Using Bicycle Parking Laws to Support Health, Business, and the Environment

Model Bicycle Parking Ordinance (national, California, and Illinois versions available)

Urban Trails: Building More Active Communities

Backing Off Bike Bans: The Legal Risks of Banning Bicycling to School

Let's Ride! 4 Requirements for a Bikeable Community

Getting the Wheels Rolling: A Guide to Using Policy to Create Bicycle friendly Communities

Move This Way: Making Neighborhoods More Walkable and Bikeable

Making Streets Welcoming for Walking

Complete Streets

Complete streets policies change how streets are designed so people of all ages and abilities can travel safely and easily, whether they are walking, biking, riding the bus, or driving. These resources can help you put complete streets policies into practice.

What Are Complete Streets?

State/Regional/Local Resolutions on Complete Streets

Local Ordinance and Findings on Complete Streets

Climate Change & Public Health

Climate change initiatives offer a major opportunity for public health professionals to help create sustainable communities and prevent chronic disease. These resources identify the role the public health community can play in articulating a climate change strategy that improves community health.

Getting Involved in Climate Change Planning: Opportunities for Public Health

Senate Bill 375: An Opportunity to Design Healthy, Sustainable Communities

An Action Plan for Public Health: Initial Recommendations for Involving Public Health in Climate Change Policy

Local Policy Scan on Climate Change Adaptation

Healthy Housing

A healthy, safe home environment provides a critical foundation for residents' well-being. Learn about the connections between housing and public health, and the tools available to protect healthy housing. For smokefree healthy housing, be sure to check out the Tobacco Control section.

Housing and Health: New Opportunities for Dialogue and Action

Creating Healthier Suburbs: Tools for Transforming Sprawl into Livable Communities

A Guide to Proactive Rental Inspection Programs

Smokefree Multi-Unit Housing: Approaches to Protect Tenants from Secondhand Smoke (Roadmap & Brochure)

Legal Options for Tenants Suffering from Drifting Tobacco Smoke (available in Spanish)

A New Lease on Life: Landlords' Right to Make Properties Smokefree

Safe Routes to School (SRTS) & School Siting

Biking or walking to school is an easy way for children to incorporate physical activity into their day. But the number of kids walking or biking to school has dropped dramatically over the last four decades. SRTS programs and smart school siting can make neighborhoods better places for physical activity while encouraging kids to walk to school safely. These resources can help you overcome challenges and adopt policies that support biking and walking to school.

SRTS: Approaches to Support Children Walking and Bicycling to School (Roadmap & Brochure)

SRTS Talking Points (available in Spanish)

SRTS: Minimizing Your Liability Risk (California-specific and national versions available)

Covering Your Bases: Basic Tips About Insurance for Nonprofit Organizations

SRTS: An Overview for California Advocates

Safe Routes to School District Policy Workbook (online policy builder)

Volunteers and Liability: The Federal Volunteer Protection Act

Smart School Siting: How School Locations Can Make Students Healthier and Communities Stronger

Model National School Siting Policies for School Districts

A Tool for Towns and Counties to Promote Walkable Schools: Understanding the Illinois Model Land Cash Ordinance

General Plans & Zoning

It's essential to have a fundamental, introductory understanding of how land use decisions are made and how advocates can effectively participate in those decisions. These resources show how to improve public health through zoning and land use planning.

How to Create and Implement Healthy General Plans

A Roadmap for Healthier General Plans

Licensing & Zoning: Tools for Public Health

Participating in the Planning Process

Many public agencies make policy decisions that affect the built environment. These resources link key aspects of the built environment to public health outcomes, outline policies to consider in the planning process, and address ways for public health professionals to get involved.

Healthy Planning Guide: An Overview of Development Strategies for Healthier Communities

Partners for Public Health: Working with Local, State, and Federal Agencies to Create Healthier Communities

Putting Business to Work for Health: Incentive Policies for the Private Sector

Healthy Places, Healthy Regions: A Closer Look at Opportunities to Invest in Health and Sustainability in San Mateo and Santa Clara Counties

Creating Opportunities for Physical Activity

How can your community encourage residents to be more active? Strong policy interventions in schools and communities can increase opportunities for safe physical activity. Our materials provide advocates and local leaders with legally sound guidance.

UNLOCKING THE STAIRWELLS
It's Not Risky – and It's Good for Business

How can the school district liability be used to create incentives for building a healthy, physically active school environment?

Opening the Schoolyard

Many communities lack safe, adequate places for children and their families to exercise and play. Schools often have a variety of recreational facilities - including gymnasiums, playgrounds, fields, and courts - but many districts close their property to the public after school hours because of concerns about security, maintenance, liability, and other costs. Joint use agreements between school districts and local government or nonprofit partners can address these concerns, making it easier to open school facilities to the community.

What Is a Joint Use Agreement?

Checklist for Developing a Joint Use Agreement

Model Child-Care Licensing Statute for Obesity Prevention

Understanding the Model Childcare Licensing Statute for Obesity Prevention: A Fact Sheet

Stairway Access

Building owners and managers sometimes keep stairwells locked because of concern about liability for injuries - but so long as they take reasonable care, opening stairwells for use by employees or the public is not likely to lead to any significant increase in risk for building owners, managers, or tenants. Our resources outline the benefits and risks of opening up office stairwells.

Unlocking the Stairwells: It's Not Risky - and It's Good for Business

Opening Up Stairways for Physical Activity: An Analysis of the National Landscape for Stairwell Use

Improving Food Systems & Healthy Food Access

With obesity rates at epidemic levels, Americans have been urged to eat healthier foods. But many low-income children and families – those at the greatest risk for obesity-related diseases like diabetes and heart disease – face major challenges accessing healthy foods in their neighborhoods. Community leaders can pursue a range of strategies to create a healthier, more sustainable food system and to make it easier for residents to access healthy foods.

Healthy Food Access

Corner stores, grocery stores, and convenience markets can be healthy community assets. Our resources cover strategies to encourage neighborhood retailers to stock healthier products (like fresh produce) and to limit the damage caused by the sale of unhealthy products.

Public Health Law & Policy 101

Having a clear understanding of the legal and policy context for any public health effort is critical for everyone working to create lasting, meaningful change. ChangeLab Solutions offers a series of publications exploring the essentials of public health law and policy.

Identifying and Reporting Misleading Ads
How to Help Enforce Federal Regulations Limiting Deceptive or Unfair Marketing

How do these links even connect to the content and type of marketing of tobacco products? This report explores the connection between marketing strategies and the health consequences of tobacco use. It provides a step-by-step guide to identifying and reporting misleading marketing practices to the Federal Trade Commission (FTC). The FTC is the primary federal agency responsible for enforcing the Federal Trade Commission Act (FTCA), which prohibits deceptive or unfair marketing practices. This report provides a step-by-step guide to identifying and reporting misleading marketing practices to the FTC. It includes a list of red flags to watch for, a checklist for identifying misleading marketing, and a list of resources for reporting misleading marketing.

September 2013

Why Adopt an Obesity Prevention Resolution?

Having a local resolution is one way for communities to promote obesity prevention policies. They are a low-cost, low-risk way to get the ball rolling on obesity prevention. They are also a great way to show your community's support for obesity prevention. This report provides a step-by-step guide to identifying and reporting misleading marketing practices to the FTC. It includes a list of red flags to watch for, a checklist for identifying misleading marketing, and a list of resources for reporting misleading marketing.

This document is a work of the ChangeLab Solutions team. It is not intended to constitute legal advice. For more information, visit www.changelabsolutions.org.

September 2013

Fundamentals of Preemption

Preemption is a powerful legal doctrine with sweeping consequences for public health. This brief explains how preemption works and how to spot preemption in a proposed law, so that advocates can participate in policy discussions about preemption in the state.

What is Preemption?
Preemption is a legal doctrine that provides that a higher level of government may block, or even displace, the power of a lower level of government to regulate a certain issue. Under the U.S. Constitution's "Supremacy Clause," federal law preempts state or local law. So, if a state or local law conflicts with a federal law, the federal law trumps the lower-level law. Similarly, if a city council, local board of health, or other local government entity passes a law that conflicts with a state law, the state law generally prevails.

This document is a work of the ChangeLab Solutions team. It is not intended to constitute legal advice. For more information, visit www.changelabsolutions.org.

September 2013

State AGs: Who They Are and What They Do

State Attorneys General (AGs) are the chief legal officers of their respective states. They are responsible for representing the state in court, enforcing state laws, and providing legal advice to state officials. This report provides a step-by-step guide to identifying and reporting misleading marketing practices to the FTC. It includes a list of red flags to watch for, a checklist for identifying misleading marketing, and a list of resources for reporting misleading marketing.

This document is a work of the ChangeLab Solutions team. It is not intended to constitute legal advice. For more information, visit www.changelabsolutions.org.

September 2013

Preemption by Any Other Name
Words and Phrases Indicating Preemptive Intent

How policies preempting local or state regulation can have a profound effect on public health, and language indicating "preemptive intent" can appear in many different forms. This brief outlines strategies to help advocates identify preemptive intent so that they can address it in new policies as they are negotiated.

Preemption is a legal doctrine that provides that a higher level of government may block, or even displace, the power of a lower level of government to regulate a certain issue. Federal laws can preempt state and local laws, and state laws can preempt local laws. Laws can use different words to imply preemption. It is important for public health advocates to be able to spot preemptive intent in proposed laws. This report provides a step-by-step guide to identifying and reporting misleading marketing practices to the FTC. It includes a list of red flags to watch for, a checklist for identifying misleading marketing, and a list of resources for reporting misleading marketing.

This document is a work of the ChangeLab Solutions team. It is not intended to constitute legal advice. For more information, visit www.changelabsolutions.org.

September 2013

Putting a Stop to Misleading Marketing
How to Report Ads That Violate Industry Self-Regulatory Guidelines

Despite the high stakes of the opioid industry in the United States, industry self-regulatory efforts to curb the flow of opioids have been limited to date. According to a 2012 report from the Federal Trade Commission (FTC), the food industry spends \$1.2 billion annually to pay for the marketing of food. This marketing takes many forms, from television ads to digital marketing to in-store promotions. This report provides a step-by-step guide to identifying and reporting misleading marketing practices to the FTC. It includes a list of red flags to watch for, a checklist for identifying misleading marketing, and a list of resources for reporting misleading marketing.

This document is a work of the ChangeLab Solutions team. It is not intended to constitute legal advice. For more information, visit www.changelabsolutions.org.

Preemption: Why It Matters for Public Health

Local control is essential for increasing access to nutritious food, clean air, active transit, and habitable housing - but local leaders face a real threat in preemption, when a higher level of government restricts or even eliminates the authority of a lower level of government to take action. Preemption often ties the hands of local leaders as they work to improve retail establishments, land use planning, housing availability, and other municipal concerns. These publications explain what you need to know about preemption and its impact on public health.
